

VISION FOR LIVING.

IOLs + Distances

Everything you see can be plotted on what we like to call the *visual range*.

- TECNIS**
Monofocal IOLs
- TECNIS**
Eyhance[®] IOL
- TECNIS**
Multifocal IOLs
- TECNIS**
Symphony[™]
Extended Range of Vision IOL
- TECNIS**
Synergy IOL

Near Vision
Typically ≈ 40 cm from the eye

Examples: Books | Cell Phones | Newspapers

Intermediate Vision
Typically ≈ 65 cm from the eye

Examples: Tablets | Cooking | Multimedia Work

Distance Vision
Typically ≈ 4 meters from the eye

Examples: Traffic Signs | Scenery | Stage Performances

The visual range plays a key role in IOL selection. The right IOL can do more than address cataracts; your doctor will choose a lens designed to meet your unique visual conditions and lifestyle.

ATTENTION: Reference the Directions for Use for a complete listing of Important Indications and Safety Information. These are not actual patients and images are for illustrative purposes only.
